Project Concept

1 Player Control

You control a ***Ball*** in this *top Down* game where *arrows* makes the player *roll*

2 Basic Gameplay

During the game, *obstacles* appear from *everywhere*

and the goal of the game is to *Reach the goal*

3 Sound & Effects

There will be sound effects *Ball rolling and sliding, ground hitting, air flowing, generation and checkpoints.*

and particle effects *Particles moving and catching (points). Material changing. Generation particles.*

4 Gameplay Mechanics

As the game progresses, *new objects appear, with different interactions* making it *More interesting, difficult, and making the gaming session longer*

[*optional*] There will also be *description of any other gameplay mechanic(s) and their effect on the game.*

5 User Interface

The *timer* will *increase* whenever *You get points*

The game will end when you reach the goal
